

# The 7th International Palaeontological Congress

## Disease in the fossil record

This symposium will focus on the pathologies evident in the vertebrate fossil record as revealed in bones, and teeth. Documentation of pathologies from gross anatomical descriptions, CT scanning, X-rays, and histological or synchrotron analyses are welcome. Topics related to current topics, debates and recent technological advances to improve differential diagnosis will be accepted. In this symposium we will showcase a deep history of palaeopathology and disease alongside discussion of the impact on the animal's life, and lifestyle, as well as what information the disease can reveal about the past.

### Conveners:

- Dr. Kyla Beguesse ([vet.paleopath@gmail.com](mailto:vet.paleopath@gmail.com))
- Victoria Gibbon ([victoria.gibbon@uct.ac.za](mailto:victoria.gibbon@uct.ac.za))

If you are interested in this symposium, please contact the conveners.
